Re: SRU: 20-002 REYNOLDS ANNEX II

Commissioners:

Please accept this letter of request concerning the expiration of the Resolution for Special Review Use Permit.

Neither myself nor the project manager, David Reynolds, can recall receiving a copy of Resolution No. 37 which sets a time limit on the permit. We did receive a letter from the planning and zoning department on November the 18th 2021 listing contingency items which needed to be completed. We completed those items and was told by the planning department on December the 7th 2021 that we were in compliance and ready to present to the Building Department.

But, during the last few years we were unable to commence with construction because of a multitude of obstacles. The main problem was the Covid pandemic, leaving us with no available sub-contractors. In addition to the immense building boom in Fremont and Canon City, any available sub-contractors were booked out for many months.

Also, we were involved in a large project in Pueblo Cty. What should have taken 6-12 months, took 3 years before we achieved the C.O. One electrician did not work on the project for 5 months; as booked on many other jobs. The Pueblo Cty building inspector told us he used to go to that part of the county once a week for inspections. Now it was 5 times a day.

After 36 months we were awarded the C.O., but had to forgo the 3134 Maple Ln project to complete the construction in Pueblo.

We would like to have the Resolution re-instated at this time, so we can proceed with the project. Currently, we are ready to move forward with an application for a building permit.

Thank you for your consideration in this matter.

Respectfully submitted,

Roger Reynolds
