There was one cottonwood and a couple other trees and shrubs that survived. That project was completed in May 2018. A lady asked to tour the Royal Gorge project so Debbie, Mia, and Rick to her to the location. There were almost 10,000 trees planted after the fire in 2013 and there are a few that survived that project. The Upper Ark Cooperative Weed Management meeting will be February 10, 2022.

Weed Director's Report:

Brittany Pierce presented her annual report via PowerPoint for 2021.

Ed asked if there were any supply issues with herbicide and Brittany said she knew there was a shortage but we have plenty in stock so it didn't impact our year. Ed suggested that CCI has a session in one of the conferences to discuss County responsibility when it comes to noxious weeds. Ralph asked what percentage of time is spent in Fremont County and Brittany indicated it varies because some of the time is spread out in different areas and on different projects. The group discussed the grants, projects, and relationship with various counties.
