RE: County Manager Report

We are currently working with the Southern Colorado Economic Development District on the Comprehensive Economic Development Strategy. This is a five year plan that is a strategy-driven plan for regional economic development.

The construction of the Pathfinder Park Community Center is underway. The company will be working on the foundation over the next few weeks and the building will start shortly after that.

We have received some guidance on the American Rescue Plan Act funds. We have started reviewing the information and are working to come up with a plan on how to best spend the funds.
