Re: Weed Advisory Board Reappointment

Commissioners,

I send this letter to share my intent to continue serving on the Fremont County Weed Advisory Board for the term beginning January 1, 2022.

I am grateful to have served on the board these last three years. From a young age I was raised to be a person who conserves resources and as such I take seriously the tasks to preserve our resources in our community.

Beginning in 2010, I worked a seasonal position with the National Park Service protecting the waters of the Blue Mesa Reservoir which feeds the Marrow Point Dam, a 3 stage, hydroelectric production plant, vulnerable to the invasive quagga and zebra mussels which we inspected all water craft for, decontaminating any necessary. Throughout this term, I have sought opportunities to become more involved and have already reached out to the director, looking to engage new opportunities in our community's protection of our precious resources.

For any of you who wish to discuss this further please feel free to contact me on my phone or email address provided above.

Respectfully,
