List of Noxious Weeds and Control Plan

Reference: "Guideline for Weed Management Plans April 2015"

State law requires all landowners to manage noxious weeds on their property. The following weeds under the Colorado Noxious Weed Act, if present, are considered a threat to the economic and environmental value of our state lands. Species listed under the Act shall be managed under its provisions. The following species have been identified in this county and should be managed in the appropriate manner as mandated throughout the term of the permit and thereafter.

List A

These are rare noxious weed species that are subject to eradication upon confirmed identification during any interval of reclamation to the site. Such List A species confirmed in Fremont County may include, but are not limited to:

*Myrtle Spurge, *Japanese Knotweed, *Giant Reed, *Elongated Mustard, *Cypress Spurge

List B

These are noxious weed species distributed throughout the State of Colorado and are subject to eradication, containment, or suppression in order to halt continued spread. Species identified within Fremont County may include, but are not limited to:

Absinth Wormwood, Black Henbane, Bouncingbet, *Bull Thistle, *Canada Thistle, Common Teasel, *Dalmatian Toadflax, Dame's Rocket, *Diffuse Knapweed, Eurasian Watermilfoil, *Hoary Cress, *Houndstongue, Hybrid Knapweed, Hybrid Toadflax, Jointed Goatgrass, *Leafy Spurge, *Musk Thistle, Oxeye Daisy, Perennial Pepperweed, *Russian Knapweed, Russian-olive, *Salt Cedar, Scentless Chamomile, Scotch Thistle, *Spotted Knapweed, *Yellow Toadflax.

List C

These are well-established noxious weed species widespread throughout the State for which control is only recommended. Common species in Fremont County include, but are not limited to:

Chicory, Common Burdock, Common Mullein, Downy Brome, Field Bindweed, Halogeton, Johnsongrass, Perennial Sowthistle, Poison Hemlock, Puncturevine, Redstem Filaree, Siberian Elm, Tree of Heaven

Management Resources

Identification and treatment can be conducted through Fremont County Weed Management or a recommended partnering agency. Please see Fremont County Weed Control’s booklet, "Guideline for Weed Management Plans," for more details such as herbicide rates and specifics about weed control methods.

Fremont County Weed Management is operated by qualified licensed applicators under the Department of Agriculture. Any management or treatment involving chemical treatment should be carried out as indicated on the label. The label is the law. Information on management planning or cost-share assistance available to the public can be discussed with the department to confirm eligibility.

***These weed species receive priority for cost-share funding.**

Other Required Action

Though not always present, it is highly advisable to keep an eye out for these species, as well as any other state-listed noxious weeds, if they begin to emerge. Heavy traffic and soil disturbances can bring about the growth of seeds dormant in the soil. Watching for this activity is key to monitoring new infestations.

In the event any List A species or large populations of List B species are observed, a site visit would be recommended during the peak growing season to discuss further management plans. Please consider weather, the presence of actively growing plants, and operation plans or activities when choosing a time. For questions or assistance, contact Fremont County Weed Management at 719-276-7317.

Applicant and Owner or Manager Acknowledgment

I have reviewed this Integrated Weed Management Plan and acknowledge the weed-management requirements and recommendations described herein.
