٦

Observed Violations (See additional pages if necessary)

15. Food separated and protected

This is a Priority item

3-302.11 (A) (1-2) - Raw Animal Food- Separation, Packaging, and Segregation (P) Observation: Raw animal foods are not separated from ready-to-eat foods during storage, preparation, or holding.

In walk in refrigerator observed raw bacon above liquid egg cartons. Separate raw animal foods from ready to eat items to protect from possible contamination.

Store foods in packages, covered containers, or wrappings to protect from unknown sources of contamination. Observed open boxes and bags in walk-in freezer, food product is left exposed.

Correct by 03/27/2021 (Corrected on Site)

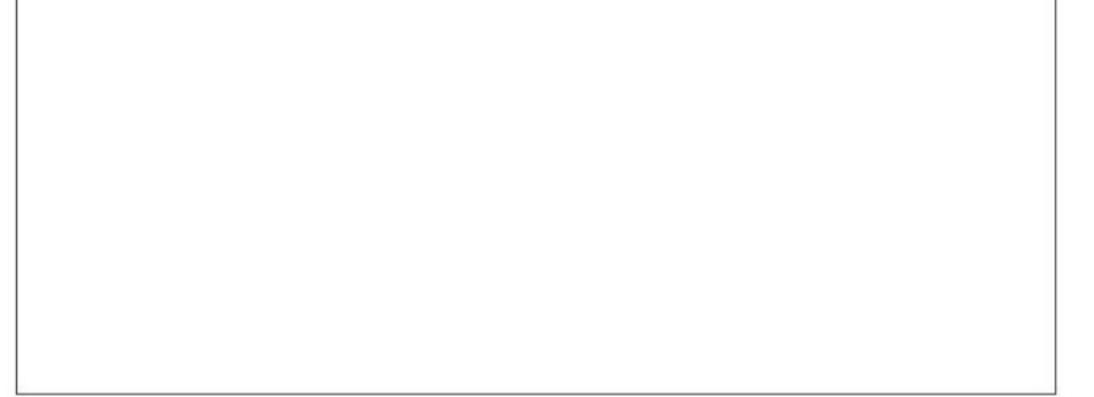

51. Plumbing installed; proper backflow devices

This is a Priority item

5-202.13 - Backflow Prevention, Air Gap (P)

Observation: Facility has an inadequate air gap between the water supply inlet and the fixture flood rim. Floor drain below ice machine is blocked. A hose has been attached to the ice machine drain pipe, the hose has been placed down into the floor sink under the 3 compartment sink. If possible, the easiest fix is to unblock the floor drain under the ice machine. If that is not possible, tie the hose in a way that it will drain in to but not be placed down inside the floor sink. An air gap is necessary to prevent possible backsiphonage of wastewater into the ice machine. discussed during inspection.
