Observed Violations:

2- Certified Food Protection Manager

OBSERVATION: **(Repeat)**

Core

2-102.12(A): Certified Food Protection Manager (C)

Inspector Comments:

Requirement for Certified Food Protection Manager since January 2019. A class is being offered locally on March 11, Flyer provided. Facility also has a list of the other providers.

23- Proper date marking and disposition

OBSERVATION: **(CORRECTED DURING INSPECTION)(Repeat)**

Priority

3-501.18: Ready-To-Eat Time/Temperature Control for Safety Food, Disposition (P)

Inspector Comments:

Observed coleslaw dated 2-14, Baked beans 2-13, and rice 2-16, all are well over the 7 day date mark requirement. The growth of Listeria is not stopped by refrigeration, after 7 days the growth of this bacteria can reach unsafe levels. All items discarded during inspection. Date marking discussed with owner and handouts provided.

38- Insects, rodents, & animals not present

OBSERVATION: **(Repeat)**

Core

6-501.111: Controlling Pests (C)

Inspector Comments:

Mouse droppings observed in backroom on unused freezer. Routinely inspect the premises for evidence of pests and clean areas that have been contaminated. Pests can transmit diseases to humans by contaminating food and food contact surfaces, effective measures must be taken to eliminate their presence. In discussion with owner, T&J pest control is used, and owner does not think there is a current pest problem.

55- Physical facilities installed, maintained, & clean

OBSERVATION: **(Repeat)**

Core

6-201.11: Floors, Walls and Ceilings-Cleanability (C)

Inspector Comments:

Floors in dish washing room are in disrepair and severely warped, no longer a smooth and easily cleanable surface. Per discussion with owner, a compliance agreement on repairing floors and walls will be established once ownership of building is finalized.

General Comments and Notes

Inspection of kitchen only.

adequate 100ppm bleach measured in dish machine.
