Compliance Status

COS R IN OUT NO N/A

<p>7.9.5.A.1 The facility is a resident camp or 24-hour child care facility and does not have a designated area for the care of ill or injured children.</p> <p>Unable to locate ill child area during inspection. The "Sick Bay" had been removed from the clinic area and relocated to each dorm, on the staff section of building. Observed one room not being used as an office, but just appeared to be storage with an overflow of chairs. The other dorm had a similar storage look with excess chairs, but did have a bed. During the inspection. the excess chairs were removed and the room was set up to be the sick bay.</p>

Inspector's Comment

License Recommended Approved.
 Residential child care facility
 6 Vaccination records reviewed, all complaint.

Routine inspection along with a complaint inspection. See separate complaint inspection.

In the girls dorm the hand towels are located outside the restroom, this is not ideal as they are rather far away from the hand sinks. Either towels are being grabbed with dirty hands before being washed or they are not being used at all. I Encourage this facility to employ a better solution.

See guidance on when hand washing is required and remind the staff to encourage hand washing before meals.
